

## SIGN DESIGN PRO Qatar Version

### SIGN DESIGN PRO - QUICK DESCRIPTION

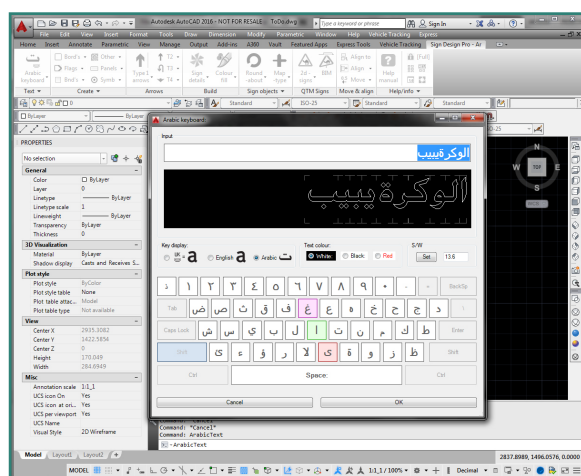

Sign Design Pro Qatar is an add-on for AutoCad that hands the user an advance tool-set to create any traffic signs to the Qatar Traffic Manual - V1 & V2. The user can start from scratch, or use one of the many advanced Dialog driven sign builders in Sign Design Pro Qatar. Both new and experienced sign designers will easily be able to design even the most complex signs using Sign Design Pro Qatar's modern and simple G.U.I.

**“ Sign Design Pro Qatar from Design Pro Software served us very well for our Bahrain project. ”**

URS  
Gary Bridges

### ARABIC KEYBOARD

Construct Arabic destinations using the Virtual Arabic Keyboard. Simply type your destination and the Arabic text will construct into an Arabic destination block to be easily inserted into your drawing. Virtual Keyboard Keys can be changed to show UK, Arabic or both letters to help designers create destinations easily.

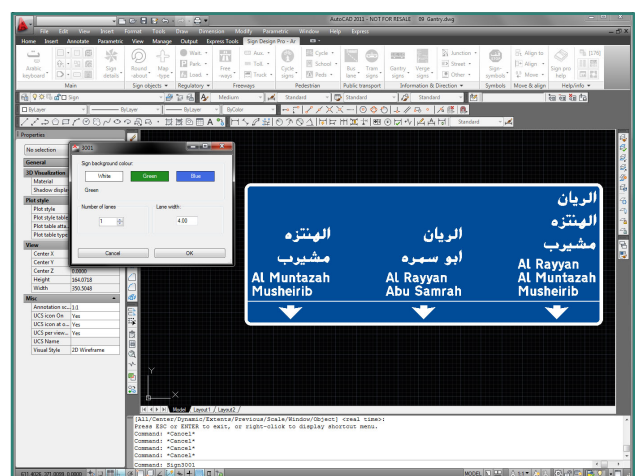

▲ Virtual Arabic Keyboard

### GANTRY

Gantry signs can be created for up to 8 lanes. The user can adjust the lane width to suit the desired carriageway and select the correct route classification colour.

### VERGE

Verge signs can be designed using one of the Dialog designers. Each verge sign can be adjusted to reflect site conditions by changing the number of lanes or adding a mileage marker underneath the sign where regulations permit.

▲ 2D Gantry sign

▲ Local street signs.

▲ Local street signs converted to 3D.

## WHY SIGN DESIGN PRO QA?

- Virtual Arabic Keyboard
- Workzone signs
- 3D Signs
- Gantry signs
- Street signs
- Built in Wind Loading
- Mount foundations at grade
- Autodesk Civil 3D Support

## SERVICES

Service signs are available in two forms; regular service signs and verge mounted advertisement type.

## WAITING

Waiting signs in S.D.P.Ar allow the user to change every aspect of the sign face including; Time, days, symbols and arrows. The sign is also changed if the direction of the arrows are activated so the user can

▲ Selection of Toll signs.

design signs and not worry about user error or overlooking an important design rule. This method of Dialog driven design saves the user hours of time.

## PARK AND RIDE

Park and Ride signs can be designed using the parking sign builder. The outputted sign face can be colour filled at design time, so when it is added to the drawing it will look like the sign face would when built on site.

“ We have been using Sign Design Pro Qatar for a major project and has been fundamental in preparing high quality drawings from QTM.

James Beddingfield  
TRL
